## 1.0 Introduction

### Advanced Quantity Surveying Practice

The Advanced Quantity Surveying Practice Course is focused on providing knowledge and skills in the core competencies and other soft skills which are required to make an all-round Quantity Surveyor.

The course will cover both pre- and post-contract processes: various procurement methods, cost planning, cost estimation, preparation of tender documents, contractor's perspective of pricing a tender, project financial management and reporting, commercial management, contract practice and administration and construction technology. Also, the course covers the soft skills a Quantity Surveyor requires in modern construction industry including Leadership, Teamwork, Working Under Pressure, Critical Thinking, Learning and Professional Ethics.

Our Advanced Quantity Surveying Practice is delivered by a trained and experienced Chairman of RICS & AIQS APC Panels, who is also an experienced and well-regarded professional in construction industry and a leading conductor of APC related CPDs. He has supported hundreds of APC candidates over the years.

Further, the following course structure has been developed by a panel of Chartered Surveyors with more than 15 years of experience in the Construction Industry. We believe that the Advanced Quantity Surveying Practice course will help Quantity Surveyors to advance their careers.

## 2.0 Who is this course for?

This course is focused on providing knowledge and skills in the core competencies and other soft skills which are required to make an all-round Quantity Surveyor/Cost Manager/Contract Manager.

## 3.0 Course Details

### Introduction to APC

You will be guided through the APC process introducing and explaining each step of the process. By completing this module, you will be well versed in the APC process and aware of all the important aspects with tips to go through the process easily.

### Advanced Quantity Surveying, Leadership and Professional Practice

This module will enable the candidates to develop their soft skills required to climb up the career ladder. The focus is to give the wholistic approach of Quantity Surveying to the candidates.

### Core Competencies

A series of courses will be conducted to cover each of the RICS Core competencies in detail. The comprehensive series of sessions will help the candidates refresh, gain and fill the gaps of their knowledge which will be helpful throughout their career. The sessions will be conducted as online group classes.

### Assessment

Upon completion of the lecture sessions, the participants are required to submit a 3000 words assignment. A certificate of completion will be awarded after passing the end of course assessment.

### Optional: Group Discussion/Study Sessions (Complementary)

---

Participants are encouraged to join the group discussion sessions which are usually conducted for the RICS APC Candidates. Online group discussion sessions will be facilitated to conduct group discussion/active learning sessions.
